Founded in 1983 by Peter Murphy

Over the last four decades, we have dedicated our business to innovation and empowering industries through data-driven decision making.

In 2023, we celebrate 40 years of innovation and delivering the true value of geospatial data for our clients and partners across the UK, Ireland, Europe and internationally. We're remembering our key milestones, our team and our relationships, as we share our vision for the future.

Innovation is our DNA, and forms one of our core values to this day alongside respect, integrity and community. We're driven by these values and always looking for ways to improve our workflows to better serve our clients in the AECO sector.

At a time where we are sitting on the cusp of the next digital revolution. Now's the time to innovate, to find new ways of working, but also the time to drive efficiencies and sustainability as there are no margins for costly errors. For that, we need to offer absolute certainty when it comes to geospatial data with precision detail and analysis. This is driving our vision for the future.

To be the first choice partner for geospatial certainty

Geospatial data is everywhere. It underpins our increasingly connected and location-dependent world and we rely on it more than ever to make critical decisions.

The value of geospatial data lies in its ability to reveal patterns, trends and relationships that can lead to more efficient and effective decisions. We envisage a world where the lines between the physical and digital environments blur, where every asset, process or person within can be replicated and connected virtually.

Our vision is to be the partner of choice for geospatial certainty and to lead our industry as the standard makers and the recognised mark of quality in our sector. Combining our knowledge and expertise with integrated cutting-edge technology, we want to drive a sustainable future that puts data at the heart, enabling informed decision making, by **unlocking the true value of geospatial data**.

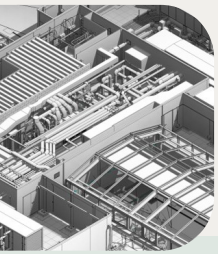

1983 — Peter Murphy & associates established in Ireland

Peter Murphy had a vision for the future, where precision meets innovation, pushing the boundaries of modern surveying.

1984 — Aughinish Project and Gas Networks Ireland

Continued oversight for project delivery on Aughinish, and the start of a 30+ year relationship with Gas Networks Ireland.

1994 — Launched satellite positioning services

We were early adopters of satellite-based surveying systems.

1995 — Anne Murphy takes over the business

Due to Peter Murphy's untimely death, the business was taken over by his wife, Anne Murphy. She was later joined by her sons Colin, Ray, Niall and Diarmuid Murphy.

2004 — Won first project on Intel Ireland

Murphy Surveys secures its first project at Intel, Leixlip.

2008 — Work began at Dublin Airport

Work began on the €2Bn Terminal 2 project at Dublin Airport, providing geospatial consultancy.

2010 — Awarded 300+ stores TK Maxx contract

Created 3D BIM models for over 300+ TK Maxx stores across the UK, Ireland, Germany, and Poland.

2012 — Awarded Tottenham Court Road station – Crossrail

In a JV with GeoData we were awarded the instrumentation and monitoring contract for the new station development.

2012 — Secured CFRAM project in Ireland for OPW

We secured circa 75% of the flood mapping contracts for all of Ireland.

2013 — Captured and hosted entire Irish rail network

We secured a contract to capture and develop an online portal to host the entire rail network, circa 1800km, and the inspection contract of bridge and riverbeds across Ireland.

2014 — First project in Germany

Captured and modelled the portfolio of TK Maxx stores throughout Germany.

2016 — Awarded Children's Hospital, Dublin

We secured the instrumentation and monitoring contract for the build of the new €1Bn+ Children's Hospital, Dublin.

2017 — First project in Spain

Captured and modelled the portfolio of Apple Stores throughout Spain.

2019 — Secured HS2 contract

Secured the Instrumentation and monitoring contract of Bromford Viaduct, Birmingham with a further £40m contract secured in 2022 with our consortium partners Sixense.

2019 — Achieved a BSI kitemark for design and construction

We were the first survey company to achieve the kitemark that recognises optimum standards for quality, reliability and true value to clients, businesses, and procurement practices.

2019 — Launch of the Murphy Geospatial portal

In 2022 we launched our geospatial portal to support our key projects and clients.

2020 — Murphy Surveys becomes Murphy Geospatial

Murphy Surveys was rebranded to Murphy Geospatial to enhance our position as an innovator in the geospatial market.

2020 — Acquisition of Omega Surveying Services

We acquired Omega Surveying Services to further expand our property consultancy offering and expertise.

2020 — Awarded Buckingham Palace contract

In 2020 we were awarded the site monitoring contract for the Palace Refurbishment Project.

2021 — Awarded BMW digital twin

We were awarded the contract to capture the digital twin of BMW's UK manufacturing facilities.

2021 — Launched the Murphy Learning Platform

Murphy Learning is a world-class talent development platform that actively supports and enhances employee engagement and experience, resulting in quality project outcomes.

2022 — Awarded National Highways

Awarded a 7-year single source framework for the eastern regions of England.

2022 — Expansion into the US with Intel

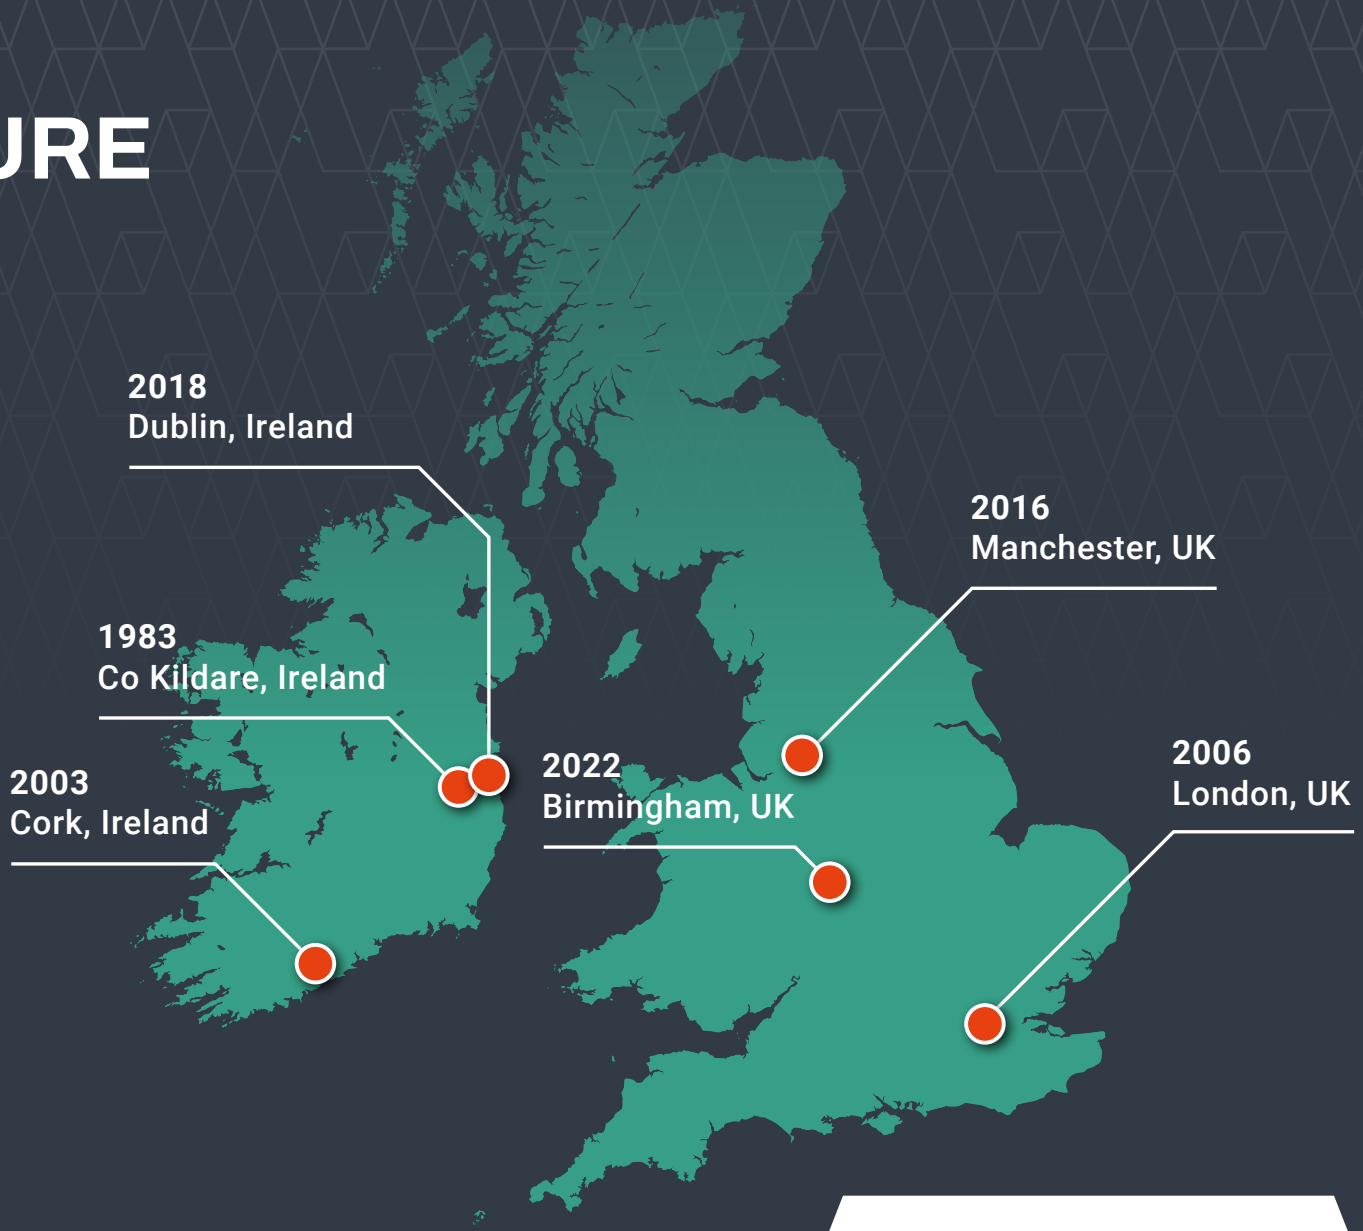

Murphy Geospatial team working with Intel in the USA.

2023 — Awarded Amazon portfolio

In 2023, we secured a project to capture and model the UK and Ireland Amazon portfolio.
